PROFESSIONAL SUMMARY

B.Tech Computer Science and Engineering – Data Science student at GIET University with approximately 5–6 years of hands-on experience in video editing and approximately 3 years of experience in social media handling and content management. Experienced across the content pipeline, including planning, shooting, photography, cinematic production, documentary-style and storytelling-driven editing, short-form social content, and platform-ready presentation. Building technical capability in Python, C, JavaScript, React, Node.js, databases, data science, analytics, generative AI, prompt engineering, and full-stack development. Seeking opportunities across video editing, creative media, social content, creative technology, software development, data, and AI.

CREATIVE / MEDIA EXPERIENCE

Video Editor & Content Creator | Independent / Freelance | Approx. 5–6 years

- Edit long-form, documentary-style, storytelling-driven, cinematic, and short-form video content.
- Plan and shoot content using visual storytelling, photography, cinematic composition, and content presentation principles.
- Prepare video content for digital and social-media platforms, including short-form videos and Reels.
- Work across the content pipeline from planning and shooting through editing and platform-ready delivery.

Social Media Handling & Content Management | Approx. 3 years

- Handle social-media content preparation, planning, and visual content management.
 - Create and organize short-form content and Reels for digital platforms.
 - Adapt content presentation to platform-oriented formats while maintaining clear visual communication.
-

TECHNICAL PROJECTS

Trace-X | FastAPI, Python, PostgreSQL, REST APIs, JWT

- Developed a stolen-device tracking application concept with authentication, device management, location tracking, and device status/history features.

Personal Portfolio | React, Vite

- Built a personal portfolio website showcasing projects, skills, education, creative/technical profile, and contact information.
